DETAILED ACTION

Response to Amendment

1. This Office Action is responsive to the amendment filed on September 17, 2004.

Response to Arguments

2. Applicant's arguments filed September 17, 2004 have been fully considered but they are not persuasive.

Applicants argue that claims 1,3, 10 and 13 are statutory under 35 USC 101; however, the examiner disagrees. To overcome this rejection, it is suggested the Applicants include hardware within the claims' body (*e.g. a computer generating...*).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1, 3, 10 and 13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to a process that does nothing more than manipulate an abstract idea. There is no practical application in the technological arts. All that is necessary to make a sequence of operational steps a statutory process within 35 U.S.C. 101 is that it be in the technological arts so as to be in consonance with the Constitutional purpose to promote the progress of "useful arts." *In re Musgrave*, 431 F.2d 882, 167 USPQ 280 (CCPA 1970). Also, a claim is limited to a practical application when the method, as claimed,

Art Unit: 3621

produces a concrete, tangible and useful result: i.e. the method recites a step or act of producing something that is concrete, tangible and useful. *See AT&T v. Excel Communications Inc.*, 172 F.3d at 1358, 50 USPQ2d at 1452.

Allowable Subject Matter

4. Claims 2, 4-9, 11,12, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US Patent No. 6000832 to Franklin et al. discloses generating a secret key, a message authentication code (MAC), an authorization request message including the MAC, transmitting the authorization request over a payment network to an issuing bank and verifying by the issuing bank the received information.
- US Patent No. 5991412 to Wissenburgh et al. discloses a random number generator.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3621

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
